Thickness	3 mm 6 mm
Diameter*	76 120 250
Height*	900 - 1200 500 - 550 - 750 - 950 - 1200 500 - 550 - 750

* Contact us for other dimensions

ITS STRENGTHS

 **Very occasional closing/opening of an access**

 **Ideal as a complement to the G6N (Ø250)**

OPERATION

Combined with the Fixator® (Came Urbaco patent), the bollard can be removed without the need for tools: a simple wrench is all that is required. A locking system prevents unauthorized persons from opening the access. A turn of the wrench and the unlocked bollard can be removed from its housing. A cover put in place of the bollard allows to leave the passage free and the place clear.

Control your access with 3 steps:

- 1 Unlock
- 2 Turn
- 3 Remove
